diginex is a fast-growth software company helping companies of all sizes with their ESG, Climate and Supply Chain data collection and reporting.

We help organizations who want to do better and be more responsible, to realize the commercial benefits of ESG and make data-driven decisions to mitigate risk, build resilience and capitalize on growth opportunities.

🧠 ESG reporting in 5 simple steps

🌱 How it works

- 🕒 One end-to-end ESG reporting journey helping you generate an ESG report 6x faster.
- 🔍 Quickly and intuitively helps you map your company against the ESG topics that are most important to your business.
- 🌐 Automatically aligns your ESG topics against all the major global frameworks (like GRI, TCFD and SASB) as well as leading stock exchanges such as HKEX.
- 🔗 Blockchain-enabled audit trail to drive accountability and transparency.
- 📄 Generate a report in multiple formats to share with investors, regulators, or on your website.
